## Evaluation on 3 classes

Vocab

Accuracy per class

| CLASS | ACCURACY | # SAMPLES |
|-------|----------|-----------|
| CAR   | 1.00     | 2         |
| BUS   | 1.00     | 2         |
| BIKE  | 1.00     | 2         |

Confusion Matrix

| Class | CAR | BUS | BIKE |
|-------|-----|-----|------|
| CAR   | 2   | 0   | 0    |
| BUS   | 0   | 2   | 0    |
| BIKE  | 0   | 0   | 2    |

Accuracy per epoch

## Output on 3 classes

The screenshot shows the Teachable Machine web interface. On the left, there are three panels for different classes: 'CAR', 'BUS', and 'BIKE'. Each panel displays '12 Image Samples' and has 'Webcam' and 'Upload' buttons. The 'BUS' and 'BIKE' panels have edit icons. In the center, the 'Training' panel shows 'Model Trained' and 'Advanced' settings: Epochs: 60, Batch Size: 16, and Learning Rate: 0.001. On the right, the 'Preview' panel shows a truck image and the 'Output' section with three bars: CAR (orange), BUS (pink, 93%), and BIKE (purple). The bottom status bar shows the date 10/03/2026 and time 00:38.

## Another Class Added

This screenshot shows the Teachable Machine interface after adding a fourth class, 'TRUCK'. A notification bubble says 'Don't switch tabs! You must leave this tab open to train your model.' The 'Training' panel now shows 'Training...' and a progress bar '00:01 - 14 / 60'. The 'Output' section on the right now includes a line graph for 'Accuracy per epoch' with 'acc' (blue) and 'test acc' (orange) lines. The 'Vocab' section on the right shows 'Accuracy per class', 'Confusion Matrix', and 'Loss per epoch'.
